

Brix Basics

Icons next to email and phone fields

Next to every email address and telephone number field in Brix there is an icon that starts communication through that channel directly from Brix.

- The **envelope icon** next to an email address field opens the email client on the computer with the recipient's address filled in.
- The **handset icon** next to a telephone number field opens the Zoom Workplace client on the computer and starts a call to the entered number.

The icons work only if the corresponding client — an email client or Zoom Workplace — is installed and set up on the computer.
