29/10/2025 14:20 1/1 ~BASIC~

## ~BASIC~

- {Type} type of invoice, can be one of the following
  - RAOT -
  - RAMP -
  - RARN -
  - RATR -
  - RAPP -
  - o RAFO -
  - ODOT Credit note. Referenced goods will go back into stocks and referenced service sales data are adjusted.
- {Currency} the invoice currency. If the department is defined as retail. the invoice can only be in the company currency. By default the invoice currency is the same as the company currency.

## **Reports**

• **Export (CSV)** - Exports a list of **approved** and **void** invoices with the range od dates defined by *From date* and *To date*. If the "Separate Goods and Services" checkbox is checked than the CSV file will contain separate lines for the sum of services and the sum of goods in each invoice.
