

Partners

Entering two or more sole trades of the same owner

When the owner of two or more sole trades is the same individual, all those trades share the same OIB, so they are not entered as separate partners. The procedure is as follows:

1. Enter the partner as a business with a name equal to the owner's first name and surname; the procedure is described in [novi](#).
2. In the ~ **DEPARTMENTS** ~ tab enter each individual trade as a separate department.

On documents, e.g. invoices, after selecting the owner partner, the matching [partner department](#), i.e. the trade, is selected as well.
