

Schedules and appointment management

~ MEMBERS ~

The tab lists the members whose [member schedules](#) use this schedule for automatic booking. It is available only in the *Schedule - Edit* dialog.

- **{Days of the Week}** — Round buttons **P U S Č P S N** narrow the list to members with a schedule on the selected days.
- Search box — Narrows the list by the member's name.
- Member list — Each item shows the member's photo and name, the recurrence with day marks (the member schedule's days printed darker), the appointment time and the date from which the member schedule applies.
- Clicking a member opens their member schedule, which can be edited right away — there is no need to open the **[Members]** form.

When no member uses the schedule, the tab shows *No members linked to this schedule*.

Check this list before changing or deleting a schedule — it shows at once which members the change would affect, and an individual member's schedule can be corrected directly from here.
