

[Users](#)

~ PROGRAMS ~

On this tab the programs the user sees in the Brix menu are switched on and off individually. The programs are arranged on tabs whose titles match the titles of the program groups in the main menu.

A user with the *user* role sees in the menu only the programs switched on here. A new user has no programs in the menu, only the option of editing their own data in the [profile](#) form, opened by clicking the  icon in the top right corner of the window.

The settings on this tab do not affect a user with the *admin* role — an administrator always has access to all programs from the modules the company subscribes to.
