Menu > *Basic data*

Recipes / Product structures

Recipes are used to define **Food & Beverages**.

Product structures are used to define **Finished Products**.

Both are universal for the whole company and can therefore be edited within any department.

Recipes for Food & Beverages and Product structures for Finished Products are entered in the same form.

Notes

- The entry of a new Recipe/Product structure is possible only after selecting a *{Type}* in the filter.
- When searching/selecting an item, the stock quantities shown in the dropdown list are valid for whatever department is currently displayed in the top left of the window.
