

Date entry

Date fields can be entered either by [Direct date entry](#) in the field or by [Chosing a date from a pop-up calendar](#).

Direct date entry

Direct date entry will accept any of the following formats: "22/01/2019", "22/1/19", "22 1 2019", "22,1,19", "22.1.2019", "22a1b19...

Notes:

- The year can be entered as a two or four digit number
- Any character, apart from a number, can be used as a delimiter between the day, month and/or year number.

Chosing a date from a pop-up calendar

The pop-up calender is activated by the  icon within the date field.

The calendar will show the previously chosen or default date in a full blue circle. The current date is within a blue circle.

Note:

- A shortcut to selecting the current date is the white calendar icon, in the right hand side of the pop-up calendar heading.
